Defeating dementia: progress and challenges on the road to 2025

Dr Maria Carrillo

Chief Science Officer, Alzheimer's Association

#DefeatingDementia

Perspectives on Data Sharing

- Over 50 million people worldwide are living with dementia; Alzheimer's up to 80%
- 2013 Dementia Summit emphasized DATA SHARING with goal to effectively treat and prevent Alzheimer's by 2025
 - 2006 launch Alzheimer's Disease Neuroimaging Initiative
 - World Wide ADNI & WW FINGERS
- **Recommendation: Work together globally to accelerate research progress, maximize investments & lead to new discoveries**

Since 2013 Dementia Summit

- 2012: Alzheimer's Association funds GAAIN
- 2015: GAAIN and DPUK launch data portals, connecting research studies and researchers around the world
- 2015: Dementia Discovery Fund launched
- 2016: CAP publishes principles for data, sample sharing*
- Since 2013, international growth of AAIC and AAIC Satellite Symposia (GBHI/DIAN)
- Since 2013, *Alzheimer's & Dementia* launches open access journals, DADM and TRCI
- 4X increase in U.S. federal funding for Alzheimer's research

\$2.3 B

AAIC > 18

The AD Data Initiative – Gates Ventures

Aims to bring together international data and to augment existing efforts by creating a common platform to access the data

Op

- **Accelerate Progress**
- **Maximize Investment**
- **Lead to New Discoveries**

- Intellectual property and competitive forces
- **Resources to Support Data Sharing**
 - Historical lack of funding and support mechanisms (NIA, BAND, GEENA)

Colin Masters

J-ADNI

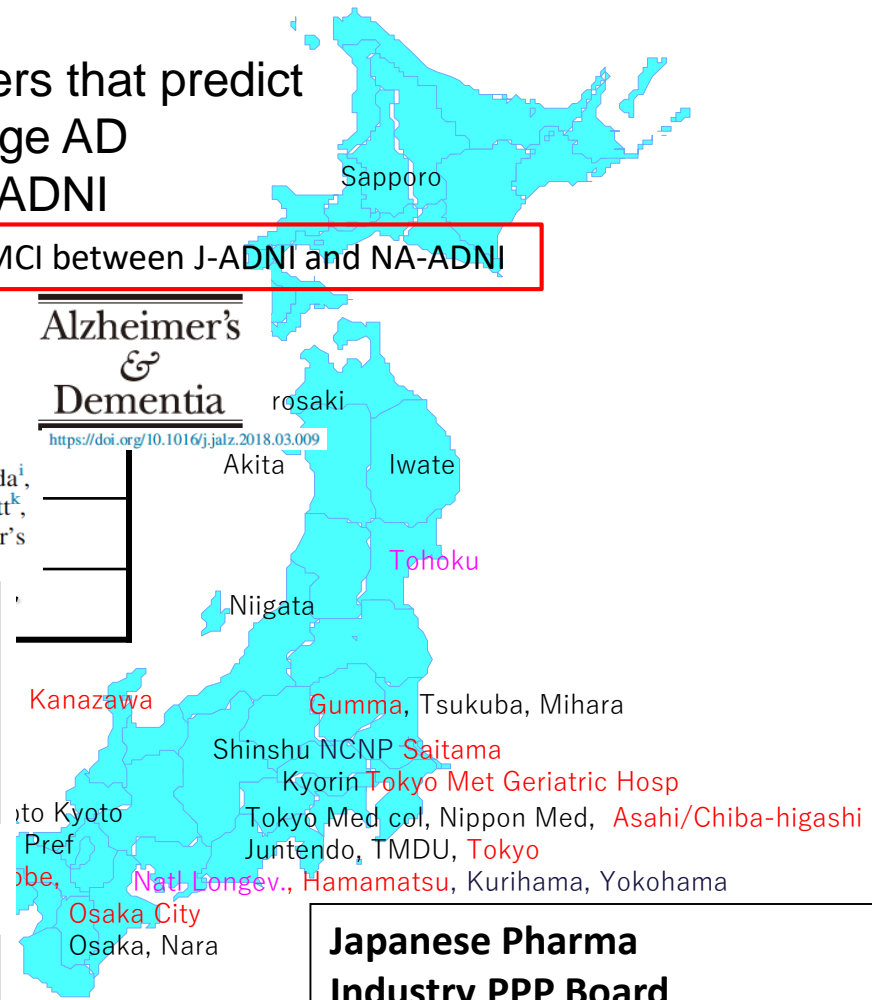

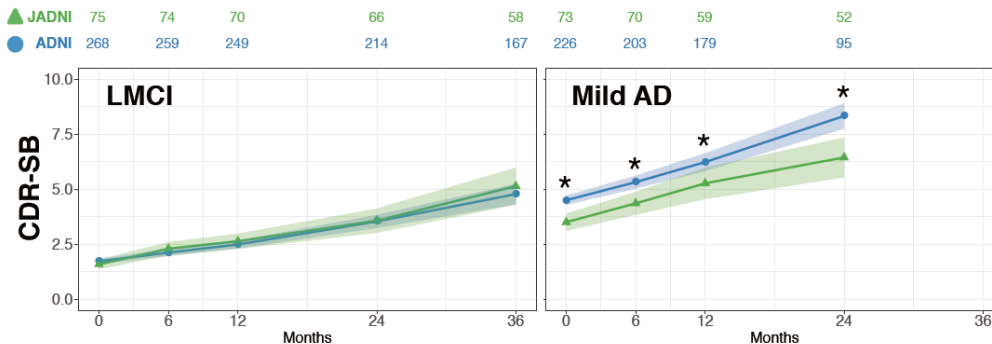

a longitudinal observational study for biomarkers that predict clinical progression of MCI and other early stage AD
Using an identical protocol to North American ADNI

Data sharing revealed highly comparable progression profiles in MCI between J-ADNI and NA-ADNI

Eli-Lilly, Merck-Banyu, BMS, Pfizer
Chugai, Novartis

J-ADNI database freely available from the National Bioscience Database Center to academic and industry researchers worldwide; also through GAAN!

Next step and further plans for data sharing

1. PPP in a competitive (exclusive) style facilitates data sharing in clinical trials

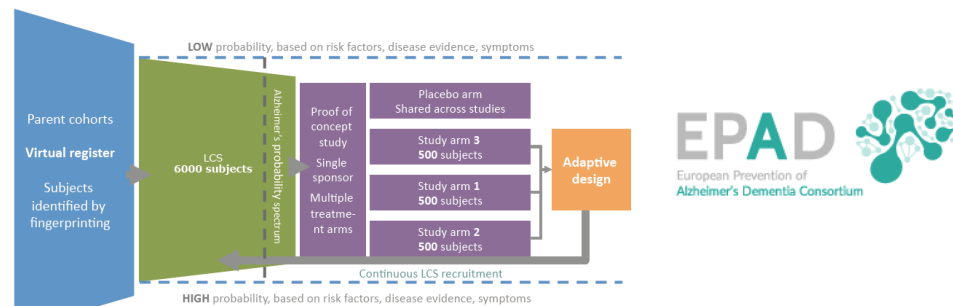

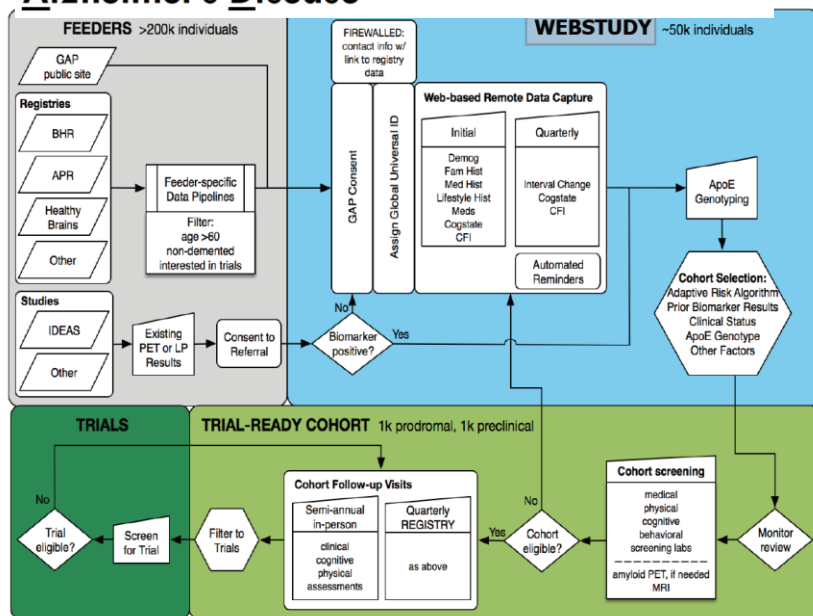

- **Anti-Amyloid treatment for Asymptomatic AD (A4) study**
- Secondary prevention trial in A β PET-positive elderly
- Baseline data (N=1169, North America, Australia, Japan) being openly shared based on the **public-private partnership** setting!

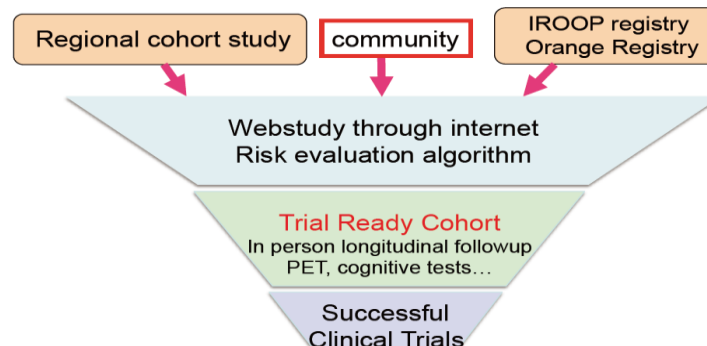

PI Reisa Sperling

2. From data sharing in observational studies to the establishment of Trial Ready Cohorts (sharing study participants and data)

Trial-Ready Cohort for Preclinical/Prodromal Alzheimer's Disease

Japanese Trial Ready Cohort for Prevention of AD

NHS Mental Health Trusts across the UK

2.5m+

De-identified electronic patient records

Data sharing – opportunities and challenges

- South London & Maudsley NHS CRIS data
- n=2460 people with dementia
- response to dementia treatment derived from **coded and uncoded** data

- 6.5 m UK Primary care patients
- n=5814 people with Rheumatoid Arthritis
- Treatment with Methotrexate reduces dementia incidence

- 500k UK Biobank volunteers
- Effects of all drugs on cognition
- Treatment with anti-inflammatories associated with better cognition

Can the data be Found, Accessed, made Interoperable and Re-used ?
